# BRANDON NYDELL

Front-end engineer mixing in experience in front-end development and marketing campaign creation to develop interactive user-centered web applications

## SKILLS EMPLOYMENT

### Software

Adobe Suite  
Office Suite  
SPSS Statistics

### Languages

Strong front-end:  
HTML5, CSS3, JavaScript,  
Node, jQuery and AngularJS  
Strong back-end skills:  
PHP & MySQL

Lots of Experience Using:  
SCSS Processors and Grunt

### Additional Skills

Object-Oriented Programming  
MVC Frameworks  
Agile Development  
Source Control:  
GIT, SVN & Mercurial  
Linux Servers  
Project Management  
Advertising & Marketing

### Web Developer July 2014 – Present

Complex Media

Part of the front-end focused development team responsible for maintaining and developing the Complex.com website in order to provide a consistent and user-friendly experience across all computers and devices.

### Web Developer Jan 2012 – July 2014

International Studies and Programs | Michigan State University

Maintained and optimized over 20 websites and backend systems for a faster and better user experience. Developed MSU's new Travelers Abroad Emergency Contact Information Database to provide better and more accurate information for the safety and security of MSU's travelers.

### Part-Time Front-End Developer Aug 2012 – Nov 2012

Fusion Systems | All Medical Solutions

Was asked to stay on the development team after my internship ended to continue developing the user interface for Spher until launch.

### Full-Time Front-End Developer Intern May 2012 – Aug 2012

Fusion Systems | All Medical Solutions

Worked as part of an international development team to develop and integrated a responsive user interface for a new SAAS product called Spher. The interface was developed to be simple, interactive and easy-to-use for busy healthcare professionals. Created the product image and marketing materials for Spher.

### IT Administrator | Web Developer Jun 2008 – Aug 2011

USA Connect

Provided IT services and network development for the entire building. Worked full-time for one summer to develop a custom contact & order management system to simplify and automate the process of turning a lead into an order. The system lowered company overhead by allowing more work to be done by less people.

## ABOUT ME EDUCATION

From Southern California  
Eagle Scout

Enjoys traveling, reading,  
gaming and programming
